PAUL M. RADY SCHOOL OF COMPUTER SCIENCE AND ENGINEERING

September 6, 2018, Gunnison, CO – Construction of the Paul M. Rady School of Computer Science and Engineering at Western State Colorado University began this week on Western’s campus in Gunnison, Colorado.

Through a pioneering collaboration with the University of Colorado College of Engineering and Applied Science, students will be able to obtain both Computer Science and Mechanical Engineering degrees as graduates of the University of Colorado Boulder.

The ultra-modern, state-of-the-art facility will have approximately 75,000 square feet of versatile teaching and lab spaces including cutting-edge instrumentation rooms, faculty offices, and areas designed to promote teamwork study and multi-disciplinary collaboration. The building will be built to the LEED architectural standard (Leadership in Energy and Environmental Design), the most widely used green building rating system in the world and a globally recognized symbol of sustainability achievement. Architect is the Farnsworth Group.

The new school is being constructed at the southern entrance to campus at the corner of Adams Street and Georgia Avenue in Gunnison and will serve as a prominent gateway to the University and the Gunnison community.
